RESEARCH INTERESTS

Blockchains, Data Analysis, Social Computing, Machine Learning.

EDUCATION

PhD., Computer Science   Saarbrücken, DE

Max Planck Institute for Software Systems - MPI-SWS   August 2018 - August 2023 (expected)
Universität des Saarlandes - UdS
Networked Systems Research Group

- My research (supervised by Dr. Krishna P. Gummadi) focuses on fairness concerns on proof-of-work blockchains and on Decentralized Finance (DeFi). Our work has been published so far in [ACM IMC'21].

M.Sc., Computer Science   Belo Horizonte, BR

Universidade Federal de Minas Gerais - UFMG – Anabin H+   March 2015 - June 2017
Laboratório de Computação Social - LoCuS

- Two-year program. My research was supervised by Dr. Fabrício Benevenuto.
- I worked on the research theory of social computing and data analysis. Our work was published on [HT'17], [WI'17], [ASONAM'16], among others. We also deployed a project to mitigate the spread of misinformation on Facebook, WhatsApp, and Twitter. It results in many systems and publications that were key to our research on misinformation dissemination within public Whatsapp groups [WWW'19], [ICWSM'19], [WebMedia'18].
- Thesis: Characterizing Interconnections and Linguistic Patterns in Twitter.

B.Sc., Computer Science with a Sandwich Year   Ouro Preto, BR / Budapest, HU

Universidade Federal de Ouro Preto - UFOP – Anabin H+   March 2009 - December 2014

Eötvös Loránd University - ELTE – Anabin H+   July 2013 - September 2014

- Four-year program + 3 semesters abroad. My research was supervised by Dr. Ricardo A. R. Oliveira.
- Honors: Granted a scholarship from the Brazilian Scientific Exchange Program (Science without Borders - CAPES) for Academic Excellence to study in a European University for fourteen months.
- Thesis: Framework Para Sistemas de Navegação de Veículos Aéreos Não Tripulados.

WORK EXPERIENCE

Research Intern   Germany

Chainlink Labs   February 2022 - present

- TBA

AI and scientific advisor   Remote

Ai Robots   March 2020 - January 2021

- Ai Robots is a young Brazillian startup approved in the 2020 Microsoft Program (We Ventures Fund). I spent 9 months working voluntarily as a scientific advisor and team leader to help them scale their robotic AI solutions and train their software engineering team.

Data Scientist and Full Stack Software Engineer   Belo Horizonte, BR

Kunumi

<div align="right">June 2017 - July 2018</div>

- I worked on machine learning projects for risk and loan default prediction and health insurance characterization and forecasting. I directly helped build and deploy an automation system for medical appointment requests using AI to address compliance with each patient's insurance plan and medical conditions. This project was awarded as the most innovative health software in Brazil in 2019 according to IT Forum 365, promoted by PwC and ITMidia.

Research Intern

<div align="right">Saarbrücken, DE</div>

Max Planck Institute for Software Systems - MPI-SWS

<div align="right">February 2017 - May 2017</div>

Networked Systems Research Group

- I was supervised by Dr. Juhi Kulshrestha and Dr. Krishna P. Gummadi. I contributed to a project on investigating political bias in social media and web search.
- Our work has been published in [CSCW'17] and [Inf Retrieval J'19].

Research Intern

<div align="right">Saarbrücken, DE</div>

Max Planck Institute for Software Systems - MPI-SWS

<div align="right">February 2016 - May 2016</div>

Networked Systems Research Group

- I was supervised by Dr. Mainack Mondal and Dr. Krishna P. Gummadi. I contributed to a project on managing online data privacy and security via user exposure.
- Our work has been published in [SOUPS'16], [IEEE Internet Computing'17], and [Int J Adv Eng Sci Appl Math'17].

Developed Systems and Applications

1. **Eleições sem Fake:** We developed multiple systems to help with the Fake News problem. Those systems were the key to our research on misinformation dissemination within public WhatsApp groups [WWW'19], [ICWSM'19], [WebMedia'18].

2. **Ira Ads**: It explores the demographics of ads from the Russian Intelligence Research Agency (IRA) that run prior to 2016 U.S. elections to exploit Facebook's targeted advertising infrastructure to efficiently target ads on divisive or polarizing topics (e.g., immigration, race-based policing) at vulnerable sub-populations. This system was key to our work published in [FAT*'19].

3. **Who Makes Trends?:** Demographic of Trend Promoters is the distribution (or combination) of demographic groups (such as middle-aged white men, young asian women, adolescent black men) in the crowd promoting (or posting about) a topic before the topic becomes Trending on Twitter. This system was key to our work published in [ICWSM'17].

4. **Search Political Leaning of Twitter Users:** This system helps users to infer the political leaning (between democratic and republican) of Twitter. It was key to our work published in [CSCW'17] and [Inf Retrieval J'19].

5. **Secondary Digital Footprint:** Twitter is social, people converse with other users by mentioning their username in their own tweets (e.g., while replying to other Twitter user's tweet or giving a shout-out to them). These conversations are their secondary digital footprint, even if they delete their account or delete selected tweets, this secondary footprint is not deleted automatically and leaks information about them. This system was key to our research published in [SOUPS'16], [IEEE Internet Computing'17], and [Int J Adv Eng Sci Appl Math'17].

SKILLS

Data Science

Social media data (Twitter, WhatsApp, Google+, Facebook) crawling, cleaning and analysis; feature engineering; descriptive and inferential statistics (incl. correlation, regression, t-test, chi-square); applied machine learning (supervised, unsupervised); Python (incl. Pandas, NumPy, SciPy, Scikit-Learn, XGBoost, Matplotlib), iPython, SQL.

Blockchain

Bitcoin, Ethereum, smart-contracts, Decentralized Finance (DeFi)

Soft Skills

Scientific and non-scientific presentations, research, team leader, communication skills, teaching, leadership.

Programming Languages

Python, C, C++, Java.

Languages

Portuguese (native), English (professional), German (A2).

Some of my scientific efforts have been covered by news media and specialized blogs, including The New York Times, The Huffington Post, MIT Tech Review, BBC Brasil, Nexo, and Folha de São Paulo.

PUBLICATIONS

For a full list of publications, kindly check my Google Scholar or DBLP profile.

Journal

1. Kulshrestha, J., Eslami, M., **Messias, J.**, Zafar, M.B., Ghosh, S., Gummadi, K.P. and Karahalios, K., 2019. Search bias quantification: investigating political bias in social media and web search. Information Retrieval Journal (Inf Retrievel J'19), 22(1-2), pp.188-227.

2. Mondal, M., **Messias, J.**, Ghosh, S., Gummadi, K.P. and Kate, A., 2017. Managing longitudinal exposure of socially shared data on the Twitter social media. International Journal of Advances in Engineering Sciences and Applied Mathematics (Int J Adv Eng Sci Appl Math'17), 9(4), pp.238-257.

3. **Messias, J.**, Diniz, J.P., Soares, E., Ferreira, M., Araújo, M., Bastos, L., Miranda, M. and Benevenuto, F., 2017. An evaluation of sentiment analysis for mobile devices. Social Network Analysis and Mining (Soc. Netw. Anal. Min.'17), 7(1), p.20.
